

Daily EQ Trend

6 Oct 2026

Technical Outlook

Nifty (22,555.75): Pull back attempt.

Nifty 50 traded with a positive bias and recovered to close in the green, gaining 0.60% at 22,555.75. On the stock front, ITC, BSE and TMPV witnessed buying interest.

Technically, a sustained move above 22,600 could trigger a further pullback towards 22,860. The RSI is showing early signs of positive divergence, indicating improving momentum and short-term bounce.

However, the broader trend remains cautious, as the index continues to remain in a downtrend. Any pullback rally should therefore be viewed as an opportunity to exit/reduce stock-specific longs.

Bank Nifty (54,714.10): Range bound.

Bank Nifty traded on a cautious note, slipping from the day's high to close on a neutral note. On the stock front, AU Bank, Federal Bank, PNB and IDFC First Bank displayed pockets of strength.

On the daily chart, the index continues to face selling pressure around its 10-EMA. Technically, 55,500 remains the major resistance zone, while 53,500 is likely to act as the key demand zone.

The overall bias remains negative.

Strategy: Maintain a cautious-to-bearish stance and avoid aggressive fresh longs.
