7<sup>th</sup> July 2026

## Technical Outlook

**Nifty (24,430.35): Buy on declines strategy, next upside 24600 - 24800.**

Nifty 50 started the week on a positive note, gaining 159.50 points to close at 24,430.35. Sectorally, Realty, Auto, and Small Caps led the gains, reflecting broad-based buying interest.

Technically, the daily candlestick pattern indicates continued strength and suggests the uptrend could extend towards 24,500. The key demand zone has shifted higher from 24,000 to 24,100, reinforcing the improving market structure. Additionally, the RSI has strengthened to 64.11, indicating sustained bullish momentum.

We continue to maintain a positive bias, and any decline should be viewed as an opportunity to accumulate long positions.

**Bank Nifty (58,291.50): Bullish bias continues.**

Bank Nifty witnessed strong buying interest, gaining 353 points to close at 58,291.50. The advance-decline ratio stood at 6:8, with HDFC Bank and ICICI Bank leading the gains.

Technically, the index continues to consolidate after its recent breakout, with the broader outlook remaining positive. A decisive move above 58,500 is likely to trigger fresh buying and pave the way towards the 60,000 marks. On the downside, 57,800-57,500 remains a strong demand zone.

The alignment of the moving averages and momentum oscillators continues to support the bullish trend. We maintain a positive bias, and any decline should be viewed as an opportunity to accumulate long positions.
