WAY2WEALTH

INVESTMENT PHILOSPHY

Way2wealth MF Model Portfolio construction is based upon the principles of diversification, Risk Categorization, Effective Risk Management and active management. The Objective is to deliver consistently risk adjusted returns over a period of time. We believe that the above would add significant value for your MF Investments.

Risk is inevitable in life, and we cannot eliminate it entirely in the portfolios. However, by using the Risk Profiler, we manage to ensure that the portfolio is managed within the risk tolerance agreed. This portfolio risk is categorized by the equity exposure.

Each portfolio invests in a well-diversified blend of investments and targets an expected level of risk over a market cycle. Each portfolio contains a number of highly rated underlying funds that aim to outperform their benchmarks.

There are many ways to find the risk portfolio that suits investors, for example by using risk profiling tools and seeking financial advice.

WAY2WEALTH

INVESTMENT PROCESS

The details of the investment steps are described below:

- ✓ **Primary focus on mutual fund scheme selection:**
  - ✓ Within each asset class, schemes are selected as per *"Internal investment ranking process"* which includes various factors like consistency of returns, Risk Metrics, Quality of Fund Management team, Portfolio Analysis, Interaction with the Fund manager etc.
- ✓ **Strategic Asset Allocation:**
  - ✓ Portfolios based on different assets
  - ✓ Predefined asset allocation rules across Equity and Debt in each of the portfolio.
- ✓ **Active Tactical decisions**
  - ✓ We make active tactical changes to category allocation in portfolios as conditions alter within the rules defined.
- ✓ **Portfolio Construction and Investment in funds**
- ✓ **Monitoring the portfolio**
  - ✓ Periodical Review of the same – monthly or as in when Required due to various changes or announcements.
