The company had a strong Q1FY24 performance with topline growing enabled by price hikes, falling RM costs and expansion across geographies. Multiple headwinds across geographies are gradually fading away. The recovery in margin witnessed in recent quarters is likely to continue going forward led by further softening in raw material prices and price hikes across regions. Further ramp up of Brazil facility will be both growth and margin accretive for the company. It continued focus on margin improvement through mix and cost efficiency, efficient capital allocation and manufacturing location optimisation will help the company achieve its cautiously optimistic guidance of double-digit growth. Given the strong thrust in providing sustainable product offerings, this should enable EPL to garner a higher wallet share from existing customers and sustain its revenue growth. Hence, we continue to maintain our ACCUMULATE stance with the stock trading at P/E 17.2x FY25E EPS of ₹12.0.
