Daily EQ Trend

Market View from the Technical Research Desk

Nifty

Nifty ended negative in yesterday's session. It started the day with a cut of 108 points but recovered most of the losses to close 58 points lower. The index found strong support within the 25,200–25,150 zone during the session. Despite the negative close, momentum remains positive, with the immediate trend still upward. Nifty continues to trade comfortably above the short-term 10 and 20 DEMA as well as the long-term 50, 100, and 200 DEMA on the daily chart. The RSI remains above 50, supporting the positive bias. On granular levels, a higher-high and higher-low formation can be observed on the Nifty chart. Immediate support is placed at 25,200–25,250, while resistance is seen at 25,300–25,400–25,650. **Since the immediate trend remains positive, traders can look to buy Nifty near 25,200–25,250 for targets of 25,300–25,400–25,650. Any sustained weakness below 25,180 should be treated as a stop-loss for the current view.**

Bank Nifty

Bank Nifty continued its positive momentum in yesterday's session. It started the day 272 points lower but managed to close with a gain of 15 points. The index remains in a strong uptrend with sustained bullish momentum. Bank Nifty is trading above the short-term 10 and 20 DEMA as well as the long-term 50, 100, and 200 DEMA on the daily chart. The RSI is placed at 65 and continues to trend higher. A bullish higher-high and higher-low pattern is clearly visible on the daily chart. Most technical indicators point toward a continuation of the positive trend and strong bullish momentum. Immediate support is placed at 56,500–56,350, while resistance is seen at 56,770–57,150. **Since the overall trend remains bullish, traders can look to buy Bank Nifty near 56,500–56,350 for targets of 56,770–57,150. Any sustained weakness below 56,320 should be treated as a stop-loss for the current view.**
