Highlights

- GABRIEL INDIA Consolidated Revenue came in at ~₹9.5bn, an increase of 18% YoY & 3.2% QoQ on the back of health traction in its PC and 2Ws division thus outperforming the industry's quarterly production by 2%. Segmentally 2Ws/3Ws grew 21.3% YoY and PC grew 17.5% YoY to ₹5.96bn and ₹2.27bn respectively.
- EBITDA and PAT grew 32% YoY and 37.1% YoY reaching ₹907.3mn and ₹575.9mn respectively with EBITDA margin at 9.6%, +108 bps YoY and +81 bps QoQ, supported by the Core-90 program benefits, a shift in the product mix towards two-wheelers and aftermarket sales, and the sunroof business achieving an EBITDA margin of approximately 14%, a significant improvement from 1.8% in Q4FY24.
- Additionally, the product mix, cost reduction efforts, higher other income (+36% YoY to ₹63.1mn) and a lower effective tax rate (-231bps YoY to 24.3%) contributed to improved profitability for the guarter.
- The contribution from two-wheelers increased from 62% in Q4FY24 to 63% in Q1FY25, and aftermarket contribution rose from 12% to 13% over the same period. However, this was partially offset by a decline in export sales, which fell to ₹196mn in Q1FY25 from ₹316mn in Q1FY24 and ₹234mn in Q4FY24.
- The two-wheeler market share decreased slightly to 30% in Q1FY25 from 31% in Q4FY24, due to a mix impact as certain models underperformed expectations. Has secured new orders from Bajaj Auto for the Pulsar and Dominar models. The electric two-wheeler market share surged to 87% in Q1FY25 from 70% in Q4FY24, driven by Ola Electric's market share gains.
- In the passenger vehicle segment, market share increased to 24% in Q1FY25 from 23% in Q4FY24, likely due to M&M's strong performance and new program wins from Tata Motors. In the commercial vehicle segment, market share saw a slight decline to 88% in Q1FY25 from 89% in Q4FY24.
- The Sunroof business delivered revenue of ₹823mn, EBITDA of ₹115mn, and PAT of ₹64mn. EBITDA margin at 14% is after paying royalty (5% of sales) and management fees. Going forward, the company aims to sustain its EBITDA margin at current levels. Currently, Gabriel's Sunroof project is ramping up volumes and has been in its own books under the wholly owned subsidiary, IGSSPL. It was expected that the Sunroof business would be transformed to a JV company formed between Gabriel and Inalfa. However, Department for Promotion of Industry and Internal Trade (DPIIT) has rejected Inalfa's application to form a JV with Gabriel India for the Sunroof project.
- As per management, the ongoing business relationship between Inalfa and Gabriel will continue with Inalfa through Gabriel Sunroof Systems Private Limited (IGSSPL). IGSSPL will continue to manufacture Sunroof products under the terms of the technical collaboration and alliance agreement executed with Inalfa. Management has highlighted that growth plans, investments, and customer-acquisition activities in the Sunroof project would continue in support of Inalfa. Gabriel has so far invested ₹860mn and has given a loan of ₹600mn to the Sunroof project. Gabriel has strong orders from Hyundai and Kia and is in discussions with other OEMs for new
- The new Solar damper product presents a significant market opportunity due to the push for renewable energy, and it offers better margins. Company is considering additional new product lines and is currently evaluating
- The management goal is to reach double-digit growth within two years, driven by advancements in the aftermarket, railways, exports, and new product applications. This, along with Core-90 program benefits.

VIEW

Gabriel started Q1FY25 on a strong footing and is targeting double digit margins in FY26. The company's margin improvement efforts are now paying dividend, as this was the consecutive second quarter when it has sustained EBITDA margin at 9% level. The company witnessed a marginal dip in its market share in the 2W segment mainly due to weakness in Bajaj Auto's export performance. The Sunroof project has been progressing well in terms of volume ramp-up and financials. The Sunroof project has delivered an EBITDA margin of 14%, which management believes is sustainable. Although its plan to transform the Sunroof business (which is currently under its own wholly owned subsidiary) to a JV company (between Gabriel and Inalfa) has not got the government's clearance, management has indicated the growth plan of the Sunroof will remain as it is It looks well-positioned for mid-to-long-term growth opportunities, having begun adding new products and applications such as sunroofs, solar dampers, E-Bike suspension, and more to come. The company is debt-free, with health cash and investments and has consistently generated strong positive cash flows. Along with that, the company is looking for a suitable inorganic growth opportunity driven by its strong brand reputation, expansion strategies, profitability focus, anticipated rise in content per vehicle, and export potential. Hence, we continue to view it as a BUY with Target Range ₹590-600 P/E 19.3x FY26E EPS ₹25.3.
