Nifty Spot Chart

Technical Outlook

The Nifty index opened higher with a decent gap of nearly 38 points owing to positive global cues. Post opening, we haven't seen any significant momentum as index consolidated in a narrow range of nearly 26 points. In the process, Nifty concluded the session near its opening tick. On a daily chart, yesterday's price action led to formation of 'Doji' candle which indicates indecision. During the day, the hourly RSI (14) struggling to cross 60 levels and the bearish divergence is still intact. For the day, 10595 will act as an immediate hurdle above which the strong resistance comes near 10640. Lower side, 10495 will act as an immediate support.

Bank Nifty Spot Chart

Technical Outlook

On Thursday, the Nifty Bank index opened marginally higher however momentum fizzled out during the initial hour of trade. Subsequently, index consolidated in a narrow range throughout the remaining part of the session. In the process, index ended the session with a nominal gain of 0.10%. At this juncture, the hourly RSI (14) trading near 40 levels. On a daily chart, it seems that 25400 – 25450 zone likely to act as a strong hurdle and it will be a daunting task for bulls to surpass this zone hence we maintain our cautious view on index.
