VIEW

Bank of Baroda's robust quarterly performance is indicative of the improving business metrics for the lender. Growth in domestic asset book was broad based, as the bank was very well able to capture the pickup in the system credit on the back of its strong branch network. Additionally, strong loan book growth in overseas market, despite challenging external environment, highlights robust business franchise the bank has developed over the years. Consistent improvement in asset quality has led the bank post lower slippage in several quarters. Also, improved PCR provides additional comfort in terms of asset quality. On the operational front, BoB's strategies on improving efficiencies have played out well as is reflected in the bank's consistently falling cost to income ratio.

The management's guidance of maintaining 3.3% margin for FY24 despite rising CoD would be driven by repricing of remaining MCLR linked book. Plans to maintain GNPA at ~3.5%, NNPA at ~0.75% and slippage below 1% indicates that the asset quality likely to remain stable for FY24, as exposure to airline also seems constrained with better provisioning.

With improving operational efficiency, stable asset quality and guidance for strong business growth in near term, we believe BoB is a good candidate to play on a PSBs rerating story. We achieved earlier stated price target range of ₹208-215 per share and hence suggest to book profit in the script. However, long-term investors can stay invested, as we believe the bank will continue to do well supported by its fundamentals.
