

Daily EQ Trend

30th June 2026

Technical Outlook

Nifty (23,946.25): Index consolidates in range.

Nifty 50 declined for the second consecutive session, losing 109.75 points to close at 23,946.25. On the sectoral front, Pharma and Healthcare outperformed, while stock-specific buying continued to support the broader market.

Technically, the index has retraced to its key demand zone, with the broader structure remaining positive. We expect the index to trade in a 23,800-24,200 range in the near term. The RSI is placed at 53, indicating that bullish momentum remains intact.

Ahead of the monthly expiry, volatility is likely to remain elevated. However, we continue to maintain a positive bias and recommend accumulating on declines within the current support zone.

Bank Nifty (57,727.35): Profit booking drags index lower.

Bank Nifty corrected for the second consecutive session and ended in the red. Despite the pullback, the broader trend remains bullish as the index continues to trade comfortably above the 57,000 marks.

The advance-decline ratio stood at 6:8, with YES Bank and Federal Bank outperforming, while Kotak Mahindra Bank, Canara Bank, and Axis Bank witnessed profit booking.

Technically, the outlook remains positively placed, and we continue to expect a breakout towards the 60,000 mark sooner or later. Any decline towards 57,500-57,000 should be viewed as a buying opportunity to accumulate fresh long positions. Bias for the day is likely to be bullish.
